POWERED BY

Step into SIGMA

Step into SIGMA

At the heart of the space, a 22.5-metre image wall creates an immersive visual horizon that transforms every event.

Surround sound, scenographic lighting and a signature scent come together to create a fully sensory experience, where every detail is designed to heighten emotion.

SIGMA, 500 m² of flexible space conceived as a living stage: a place where technology becomes a language and every project is transformed into a memorable experience.

Bring your content to life

Create impact

Here, everything is about precision. A space designed for total control, where sound, light and image are calibrated down to the finest detail and remain perfectly synchronised, whatever the format.

Sound, powered by L-Acoustics X12 / X8, delivers clear, powerful and immersive coverage.

Lighting, orchestrated by LUPO SuperPanel, shapes the space in real time and sets the rhythm for every sequence.

Flexible and modular, SIGMA hosts your productions, from product launches and conferences to seminars and evening events, with the same high standard throughout: a sharp, coherent and perfectly controlled result, with lasting impact.

Transform SIGMA

SIGMA is a space that evolves with each project.

Thanks to an integrated truss network, the venue naturally adapts to every staging concept, whether through additional lighting, suspended set elements, mirrors, preview monitor or expanded audiovisual installations. Every element finds its place, without compromise.

This flexibility extends to the furniture, entirely custom-designed to support different uses, ease circulation and integrate seamlessly into each scenography.

A venue conceived down to the finest detail, capable of evolving without ever losing its intent.
